SUMMARY

Senior Software Engineer with 5+ years of experience building and owning business-critical, high-scale enterprise applications in healthcare domains. Proven expertise in React, Java, and Spring Boot with strong ownership of UI architecture, system integration, performance optimization, and cost reduction initiatives. Experienced in designing scalable UI systems used by thousands of daily users, driving measurable improvements in productivity, reliability, and operational efficiency.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript

Frontend: React, HTML5, CSS3, Micro-Frontend Architecture

Backend: Java Spring Boot, REST API Design, Microservices

Databases: RDS (PostgreSQL)

Cloud & Messaging: AWS EC2, S3, RDS, SQS, MSK

Monitoring & Analytics: Amplitude Events

Tools: Git, GitHub, JIRA

EXPERIENCE

Senior Member of Technical Staff

Apr 2025 – Present

Athenahealth, Chennai

- Owned and designed critical UI services supporting prior-authorization workflows used by 2–3K daily users handling 50K tasks per day.
- Designed scalable REST API error-handling contracts enabling backend-driven custom error codes and dynamic UI error rendering.
- Implemented monitoring and safety nets using Amplitude events, reducing production issues by 30%.
- Acted as subject-matter expert across frontend and backend services, mentoring engineers and reviewing designs and pull requests.
- Scrum Master** (Nov 2024 – Present) — Led sprint planning, reviews, retrospectives, sprint demos, and facilitated cross-team collaboration and delivery.

Member of Technical Staff

Mar 2021 – Mar 2025

Athenahealth, Chennai

- Owned and revamped AuthOps UI end-to-end, introducing Z-pattern UI design and improving productivity by 27%.
- Removed backend-for-frontend dependency by enabling direct browser-based API calls.
- Reduced AWS EC2 infrastructure cost by 20% via migration to lightweight micro-frontend architecture.
- Designed a configuration-driven data-enrichment UI framework enabling payer-specific workflows without code duplication, increasing automation by 34% and significantly reducing manual initiation, agent follow-ups, and prior authorization effort.
- Designed automation test scenarios reducing manual regression testing effort by 90%.

Software Engineer

Nov 2020 – Mar 2021

Oracle Cerner, Bangalore

- Developed reusable React components for healthcare applications in collaboration with product and design teams.

INTERNSHIP

IXP Intern

Aug 2018 – Jul 2019

SAP Labs, Bangalore

- Built enterprise-grade applications using SAP UI5 as part of a custom development team.

EDUCATION

M.Tech in Software Engineering, MNNIT Allahabad

2017 – 2019

CPI: 8.2 / 10
